

ClinixDev / VetFlow — Features for Veterinary Clinics

Product positioning: multi-branch veterinary practice management (PMS) with reception, clinical, billing, inventory, and optional AI/social add-ons.

App name in UI: ClinixDev

Repo: Vetflow

1. User roles & access

Role	Purpose
Clinic Admin	Full clinic operations, staff, branches, settings, reports, subscription
Doctor	Consultations, prescriptions, patient history, appointments (view), AI assistant
Receptionist	Front desk: appointments, walk-ins, customers, pets, billing, inventory

Access is enforced via **capabilities** and **subscription feature flags** per organization.

2. Subscription feature modules

These can be enabled/disabled per organization (super-admin / plan):

Feature flag	Label	What it unlocks
appointments	Appointments & walk-ins	Scheduling, walk-in queue, public booking
inventory	Inventory management	Catalog, stock, supplier invoice OCR intake
sales	Sales & invoicing	Invoices, checkout, payments
reports	Advanced reports	Analytics charts, AI analytic reports
multi_branch	Multi-branch access	Multiple clinic locations, branch switcher
ai_assistant	AI assistant	In-app clinic chatbot (Groq)
social_automation	Social media automation	Meta (Facebook/Instagram) posting

Opt-in (super-admin must enable explicitly):

Feature flag	Label
branded_pdfs	Branded PDF documents
consult_tracking	Consultation time tracking
clinic_benchmarking	Cross-branch benchmarking
camera_feed	Live camera feed (snapshot URLs)

3. Dashboard & navigation

- **Role-based home dashboard** with KPI widgets (appointments today, walk-ins, checkout queue, invoices, low stock, etc.)
 - **Quick Action Buttons (QAB)** — role-specific shortcuts (admin: 14, reception: 6, doctor: 6)
 - **Branch switcher** (multi-branch orgs)
 - **Global search** (🔍) — customers, pets, invoices
 - **My Profile** — name, phone, password, profile photo
 - **Blurred navigation loading** + branded favicon during route changes
 - **Upgrade / subscription** page for plan management
-

4. Appointments & scheduling

Routes: `/dashboard/appointments` , `/dashboard/schedule`

- Book appointments (staff wizard: customer lookup, new pet, doctor, date/time, reason, emergency flag)
 - **Multi-provider day calendar** — columns per doctor, 7 AM–7 PM grid, duration blocks
 - Date filters: Today, Tomorrow, custom date (URL `?date=`)
 - Appointment lifecycle: requested → confirmed → rescheduled → checked-in → completed / cancelled / no-show
 - Confirm, reschedule, cancel, mark no-show, mark emergency
 - Check-in from appointments (assign attending vet → creates visit)
 - Follow-up appointments linked to prior visits
 - Tabs: Upcoming, Emergency, Closed
 - **Public online booking** — `/book/{clinicSlug}` for pet owners (request slot; staff confirms)
-

5. Walk-ins & visit queue

Route: `/dashboard/walk-ins`

- Register walk-in visits (patient lookup, reason, emergency, assign vet)
 - Live visit queue: **waiting** → **consulting** → **ready for checkout** → **completed**
 - Reception view of consulting visits (including **paused consultation** status)
 - Checkout queue handoff to billing
-

6. Customers & pets

Routes: `/dashboard/customers` , `/dashboard/pets`

- Customer CRM: name, phone, email, address, branch
 - Pet/patient records: species, breed, gender, DOB, weight, allergies, medical notes
 - Creatable species dropdown (Dog, Cat, Bird, etc. + custom)
 - Customer detail → pets list; pet detail → visit history
 - Patient lookup panel (phone search) reused in walk-ins and appointment wizard
-

7. Clinical / consultations

Routes: `/dashboard/doctors` , `/dashboard/doctors/[visitId]`

Consultation workspace (SOAPDRx)

- Tabbed clinical notes: **S, O, A, P, D** (diagnostics/labs), **Rx** (prescriptions)
- **Tab gating** — required fields before advancing; draft auto-save
- Visit types: **Standard, Lab, Surgery**
- Vitals: temperature, heart rate, respiratory rate, weight
- Services performed (from service catalog)
- Prescription lines linked to inventory catalog or free-text
- Quick-add catalog items from consultation
- Follow-up recommendations (preset day intervals)
- **Pause / resume consultation** with reason and timer
- Pet visit history sidebar
- Lab orders & document uploads panel
- Complete consultation → moves visit toward checkout

Doctor queue

- Waiting and active (consulting) visits for assigned doctor
 - Access to patient medical profile / history
-

8. Prescriptions

Route: /dashboard/prescriptions

- List finalized prescriptions
 - **Prescription PDF** export
 - Treatment / visit summary **PDF** for doctors
-

9. Billing & invoicing

Routes: /dashboard/invoices

- Create invoice from completed visit
 - Line items: services, products, tax
 - Payment methods: cash, card, bank transfer
 - **Partial payments** at checkout and on existing invoices
 - Invoice PDF export
 - Payment status tracking (paid, partial, unpaid)
 - Receptionist billing/checkout workflow from walk-in queue
-

10. Inventory & catalog

Route: /dashboard/inventory (Catalog + Scan supplier invoice tabs)

Product catalog

- Types: **Service**, Medicine, Food, Treats, Accessory
- Categories (creatable per org)
- Per-branch stock, reorder levels, purchase/selling price
- Stock adjustment (manual, purchase, expired, return)
- Low-stock alerts on dashboard
- Inventory forecast (QAB modal)

Supplier invoice intake (OCR)

- Upload invoice image (JPG/PNG/WebP)
 - AI extraction of line items (Groq / OpenAI)
 - Review modal: match to catalog or create new product
 - **Product type & category** per new line on intake
 - Confirm intake → updates stock + stock movements audit
-

11. Reports & analytics

Routes: /dashboard/reports , /dashboard/benchmarking (opt-in)

- 6-month revenue and visit trend charts
 - KPI summary cards
 - **AI analytic narrative** reports (Groq) via dashboard QAB
 - **Clinic benchmarking** — compare branches/metrics (opt-in)
-

12. Staff & attendance

Route: /dashboard/staff

- Invite staff (admin, doctor, receptionist roles)
 - Assign staff to branches
 - **Weekly schedule templates** + one-off shift overrides
 - Generate shifts from templates
 - **Daily attendance** sync (present, late, absent, off)
 - Staff attendance overview on admin dashboard
-

13. Branches & multi-location

Route: /dashboard/branches

- Create/edit clinic branches (name, address)
 - Branch-scoped data (appointments, visits, inventory, invoices)
 - Active branch cookie / switcher
-

14. Clinic settings

Route: /dashboard/settings

- Timezone & currency
 - Clinic contact info & logo
 - **Tax settings** (name, rate, applies to products/services)
 - **Services catalog** (consultation, vaccination, surgery fees, etc.)
 - **PDF branding** (accent color, footer) when enabled
 - **Camera devices** CRUD when camera feed enabled
-

15. AI assistant

Route: /dashboard/ai-assistant

- Clinic-scoped AI chat for workflows, drafts, operational guidance
 - Powered by configured LLM (Groq)
 - Also available as dashboard slide-over (QAB)
-

16. Social media automation

Route: /dashboard/social

- Connect Facebook / Instagram (Meta OAuth)
 - AI-assisted post drafting
 - Schedule/publish social posts per branch
-

17. Live camera feed (opt-in)

- Register camera snapshot URLs per branch (settings)
 - View refreshed snapshots from dashboard QAB / reception
 - *Note: MVP uses snapshot URLs, not full RTSP/HLS streaming*
-

18. Documents & labs

- Upload documents to visits (categories)
 - Lab test catalog
 - Lab orders per visit with status workflow
 - Lab result text entry
 - **Lab order PDF** export
-

19. Public & onboarding (clinic-facing)

Route	Purpose
/register	New clinic registration
/login	Staff login
/account-setup	Post-signup branch/org setup
/request-access	Request platform access
/book/{clinicSlug}	Public appointment request portal
/suspended	Account suspended state

20. PDF & document exports

Export	Description
Invoice PDF	Branded or default clinic invoice
Prescription PDF	Finalized Rx for pet owner
Treatment / visit PDF	Clinical summary for doctors

Lab order PDF	Lab request / results export
---------------	------------------------------

Branded styling when `branded_pdfs` is enabled.

21. Security & audit

- Organization-scoped Row Level Security (Supabase)
 - Role + capability checks on routes and server actions
 - Feature flags per subscription plan
 - Audit logging for sensitive actions
-

22. Platform-only (not sold to clinics)

- Super Admin portal — org registry, billing, users, audit
 - Platform impersonation of clinic accounts
-

23. Planned / partial

Item	Status
True RTSP/HLS live camera streaming	MVP = snapshot refresh only
Custom RBAC / role builder	Fixed roles + permissions explainer
Full rich PDF lab reports	Plain-text lab PDF today

Document generated from ClinixDev / VetFlow codebase — capabilities, features, routes, and product audit.
